DETAILED ACTION

1. This application has been examined.
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in-

- (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
- (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

3. Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Garg et al (6567846).
4. Regarding claim 1, Garg et al show a navigation device for producing navigation services and displaying a navigation image (Figure 1A, 10B, 11A, column 6 lines 54-58), including:
application means for performing navigation services based on information from an external unit (such as a network - column 7 lines 22-40, column 11 lines 10-20) , application control means for controlling application according to an internal state of the navigation device (such as column

26 lines 7-25 and 55-64 which controls based on internal definitions set at the client by the user), screen control means for controlling display of the navigation image according to an instruction from the application means (the customization such as in column 7 lines 5-15, column 26 lines 30-67, column 31 lines 35-50, Figures 14A, 15A-E), and display means to display the navigation image according to the instruction (Figures 14A, 15A-E).

5. Regarding claim 2, the external unit is via a network (column 7 lines 22-40, column 11 lines 10-20).

6. Regarding claim 3, the instruction is transferred between the screen control, application control, application means, and display via an event queue and call function (implicit within column 23 lines 15-40 for example).

7. Claims 4 and 5 show the same features as above and are rejected for the same reasons.
